SUMMARY

Motivated and skilled Computer Engineering student with hands-on experience in full-stack web development using technologies like Python, React.js, Node.js, and MySQL. Proven ability to build scalable applications, including real estate and time tracking platforms, with features like authentication, real-time communication, and data visualization. Strong foundation in programming, APIs, and responsive design, complemented by certifications in web development and data science. Quick learner with a passion for solving real-world problems through technology

SKILLS

- Full-stack development
- Python programming
- Database management
- Project management
- Team collaboration
- Problem solving

PROJECTS

ESTATE HUB REAL ESTATE WEB APP

- Built a real estate web app using the MERN stack with listing management, JWT authentication, and real-time chat via Socket.io.

TASTY TABLE RECIPE DISCOVERY PLATFORM

- Developed a global recipe discovery platform using Meal DB API for search and filtering by cuisine, ingredients, and dietary needs.

INTERNSHIP

Python Developer Intern | January 2025-May 2025

Grownited Private Limited, Ahmedabad, India

- Designed and built a full-stack Time Tracking Application using Python (FastAPI), React.js, and MySQL with role-based access for Admin, Project Manager, and Developer to manage projects, modules, and tasks.
- Implemented real-time task tracking and reporting features to monitor developer performance, visualize project timelines, and support data-driven decision-making.

EDUCATION

Bachelor of Technology in Computer Engineering | 2021-2025

U.V.Patel College of Engineering, Kherva, Mehsana

ACCOMPLISHMENTS

Level 3: GenAI-Google Cloud Arcade (Sep 2023)

- Completed advanced hands-on labs on generative AI, prompt engineering, and AI model deployment on Google Cloud.
-
